

HEALTH & WELLBEING PROTOCOLS

The Florida Podiatric Medical Association's commitment to provide continuing education for our members, while also ensuring a safe learning environment, will be paramount at SAM 2022.

The safety and wellbeing of our attendees is of utmost concern and remains our prevailing priority.

FPMA will continue to evaluate the safety of our attendees to determine if we need to alter our course of safety protocols – and will add enhancements as needed to ensure the safety of our onsite attendees.

FPMA plans to execute the following best practices to help attendees stay healthy and to reduce exposure and risk:

SAM 2022 attendees will be encouraged to wear masks throughout the conference.

Hand sanitization stations will be distributed throughout the conference. Attendees are encouraged to utilize frequently.

Recurrent hand washing is recommended.

Food safety protocols will be in place including food display, packaging and service.

Social distancing will be encouraged. Please be mindful of others.

Shared spaces will be disinfected daily.
